

REALIZZARE MOBILI E STRUTTURE ..dalle più semplici alle più complesse con il SISTEMA WEDI

Wedi, azienda tedesca leader di mercato ormai da trent'anni nel sistema di **costruzione a secco** con polistirene estruso rivestito, è presente in Italia con Wedi Italia.

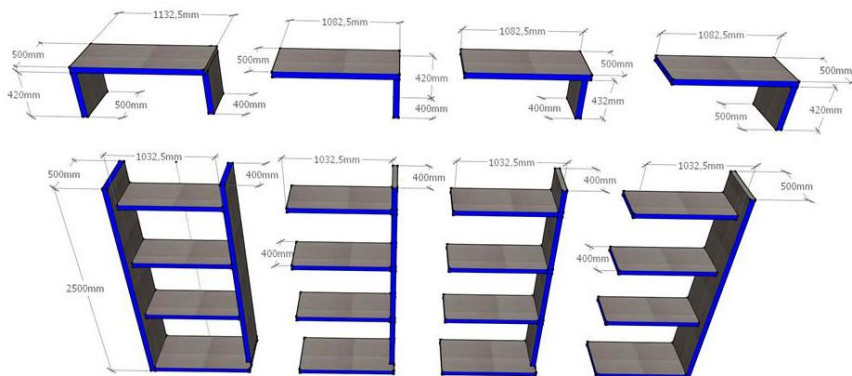

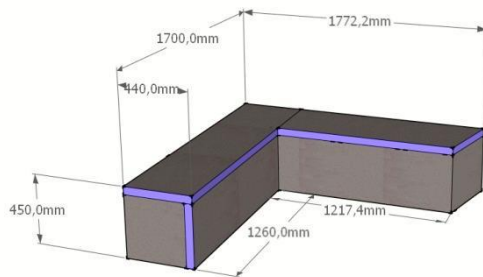

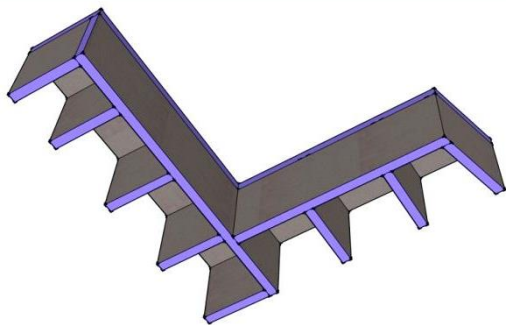

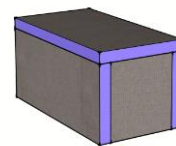

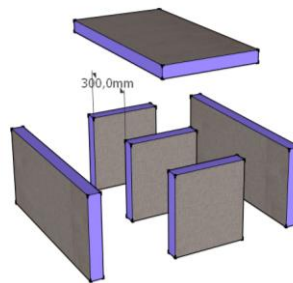

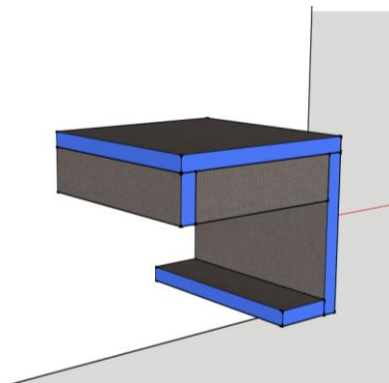

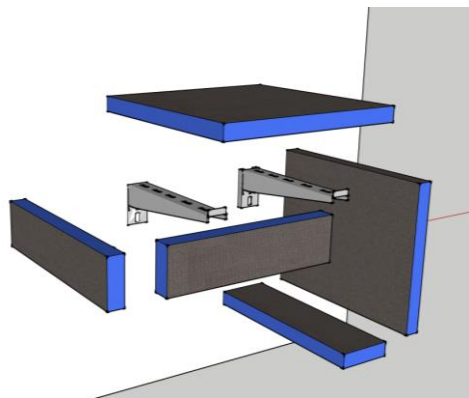

Wedi lavora il polistirene estruso al fine di trasformare un materiale leggero, autoportante, assolutamente impermeabile, di facile installazione e lavorabilità, subito pronto in pannelli e forme che possono essere intonacati o rivestiti in piastrelle d'ogni genere.

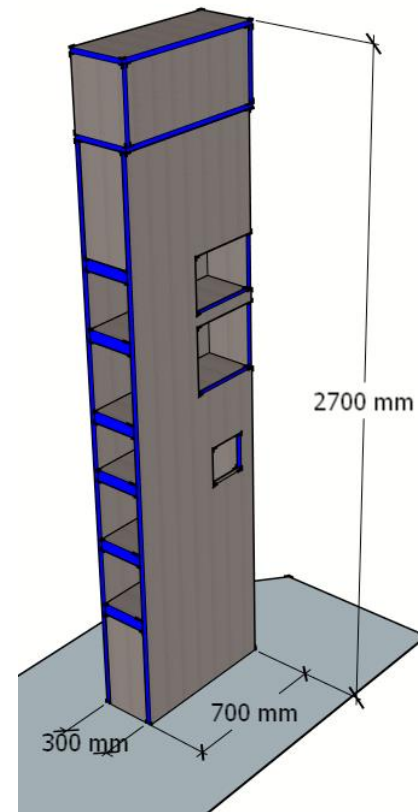

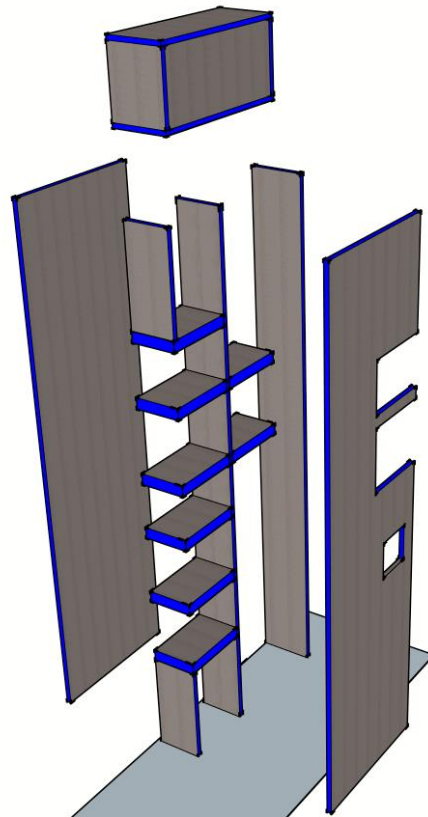

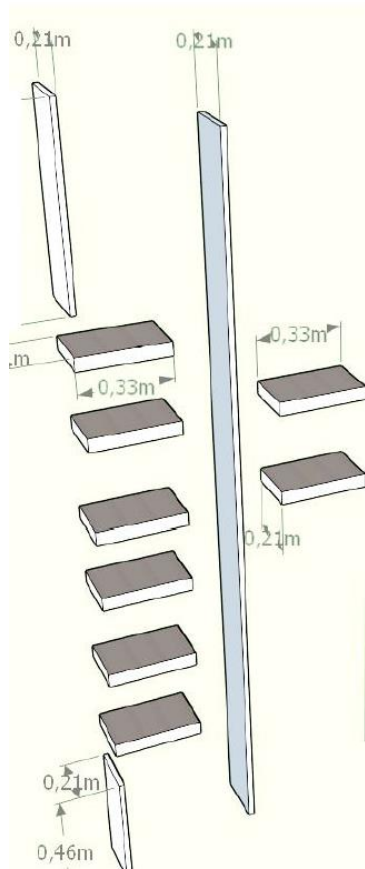

Semplici pannelli assumono le più diverse forme da rivestire: pareti, mensole, scaffali, portalavabo, panche, colonne, vasche, cupole e molto altro .

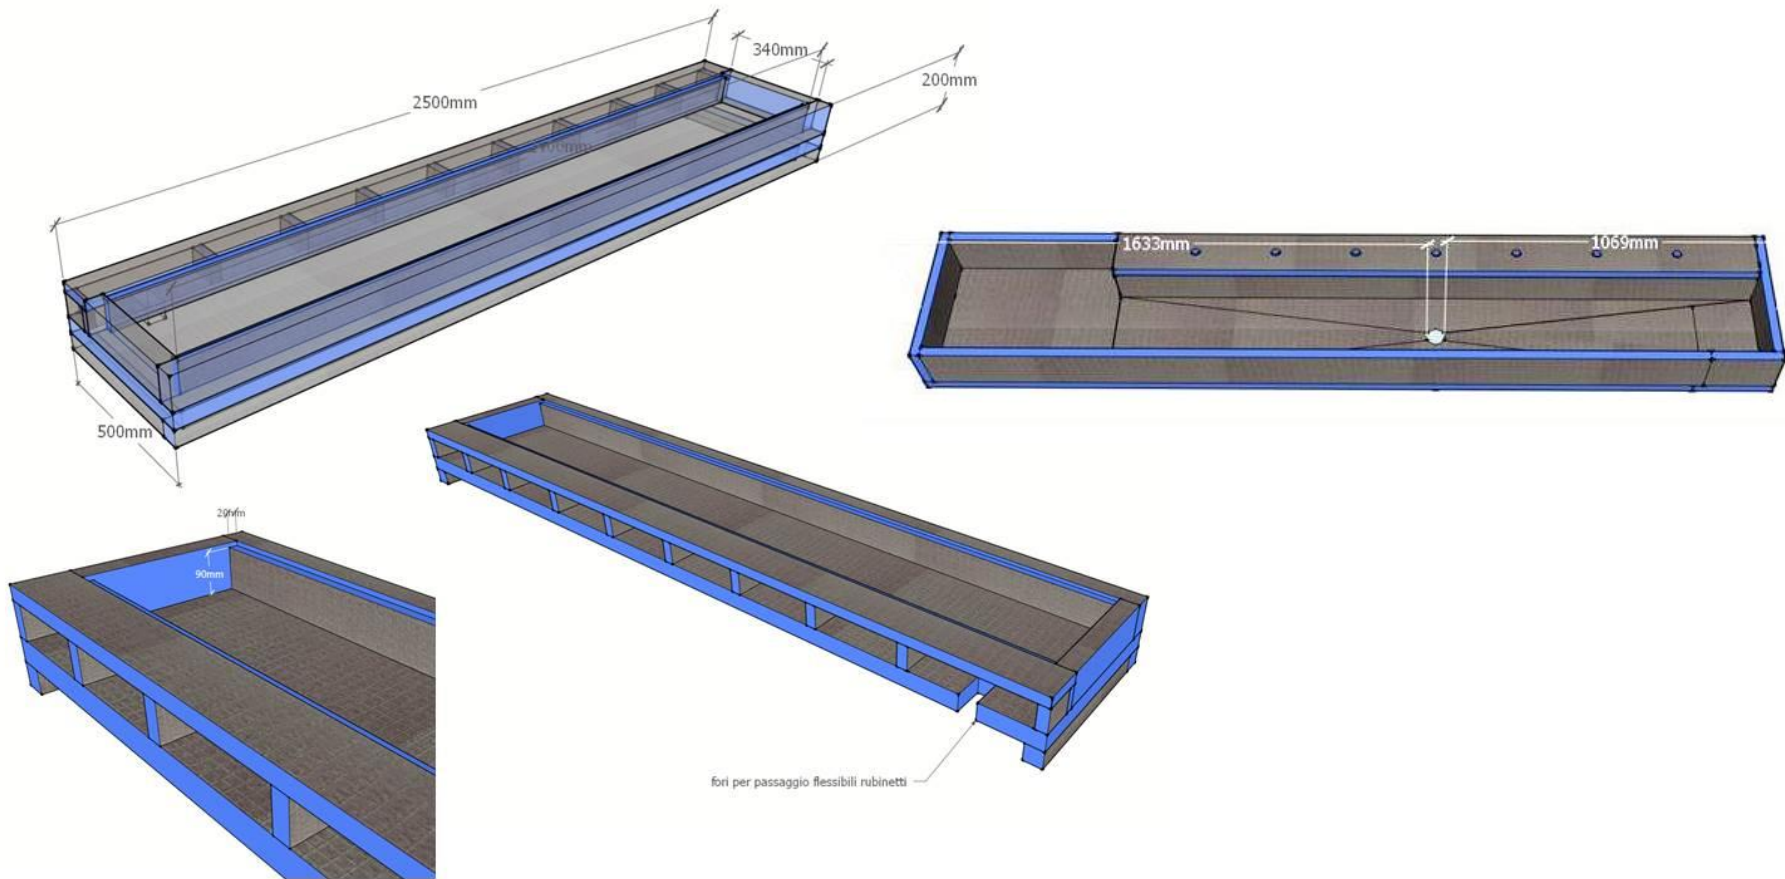

REALIZZARE MOBILI E STRUTTURE CON IL SISTEMA WEDI E' PIU' FACILE, VELOCE E CONVENIENTE RISPETTO AL SISTEMA COSTRUTTIVO DI PROFILI E CARTONGESSO E SOPRATTUTTO E' IMPERMEABILE AL 100% .
SE LA STRUTTURA E' IN UN AMBIENTE BAGNATO (bagno – cucina) QUESTO COMPORTA UN ULTERIORE E IMPORTANTISSIMO VANTAGGIO IN TERMINI DI TEMPO E DENARO PERCHE' IL SISTEMA WEDI NON HA NECESSITA' DI ESSERE IMPERMEABILIZZATO PRIMA DELLA RIFINITURA (piastrelle – vernici – resine).

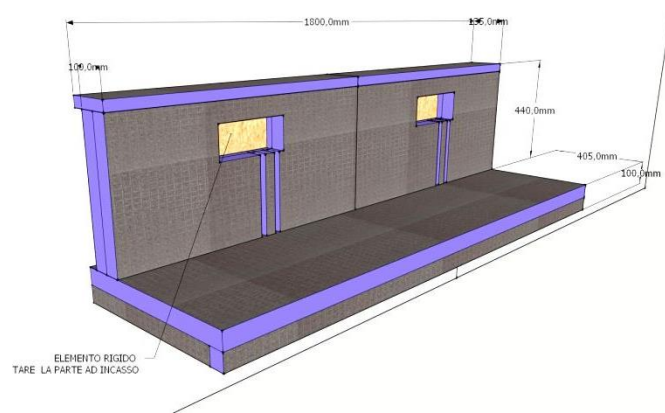

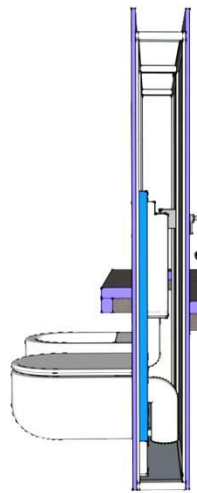

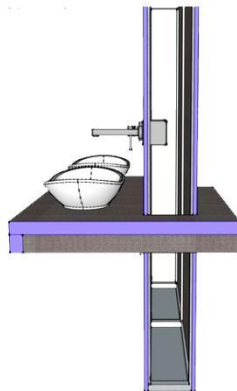

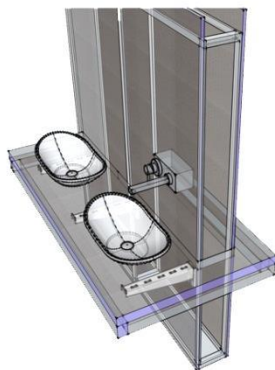

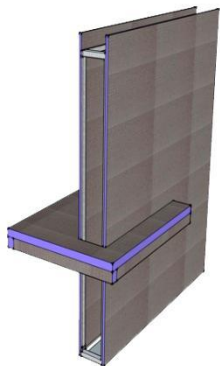

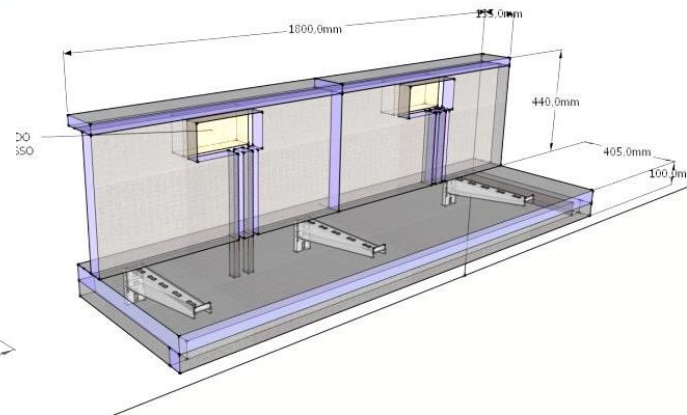

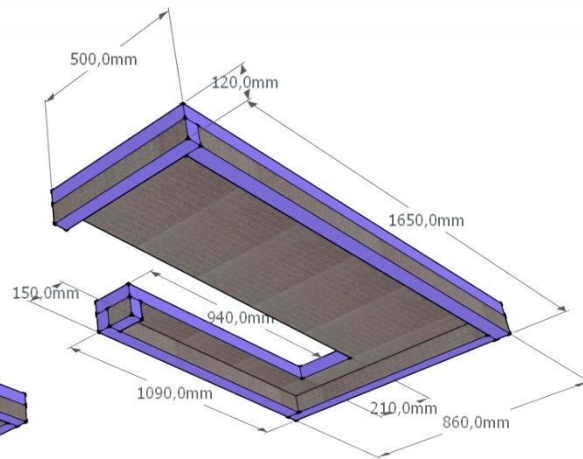

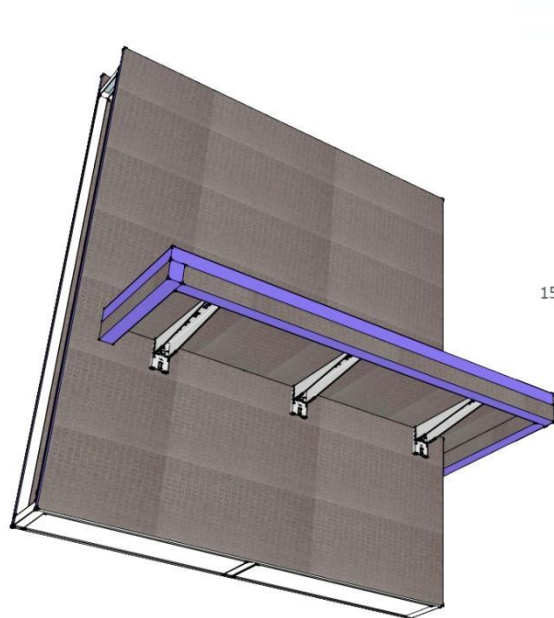

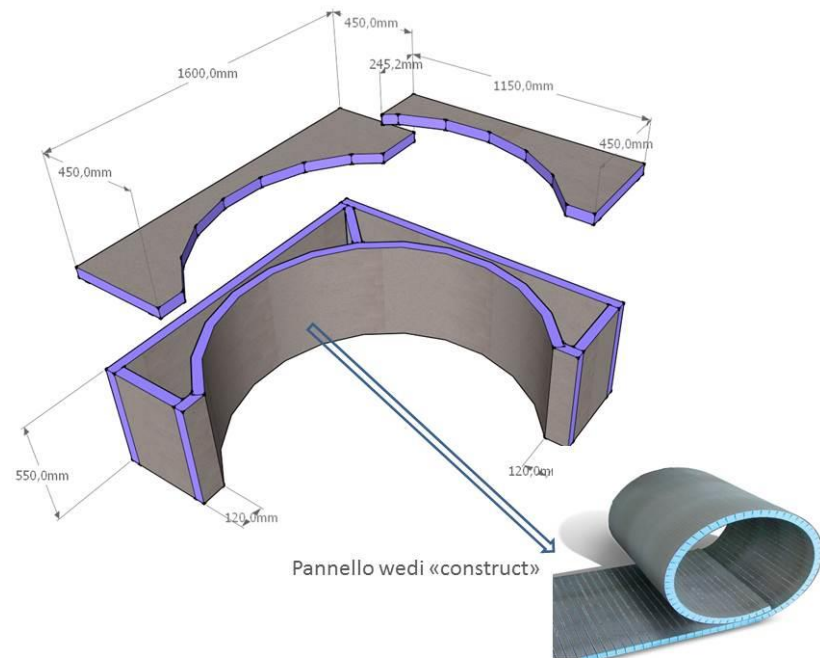

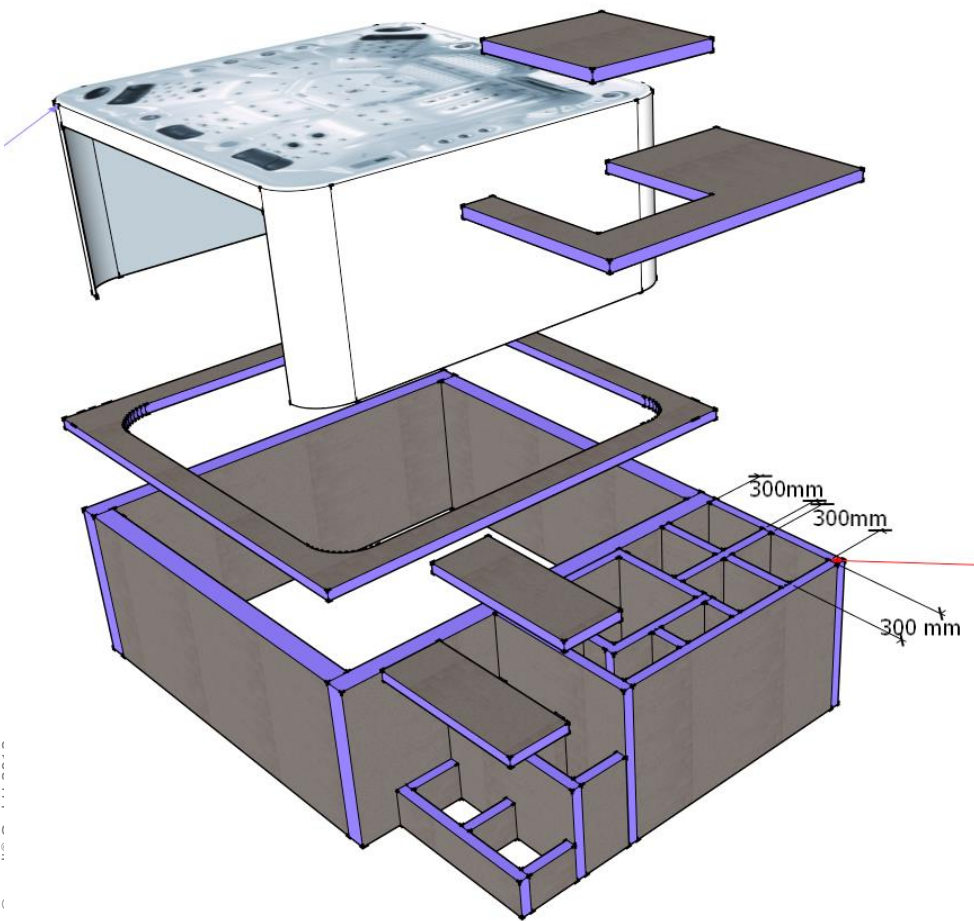

REALIZZARE MOBILI E STRUTTURE ..dalle più semplici alle più complesse

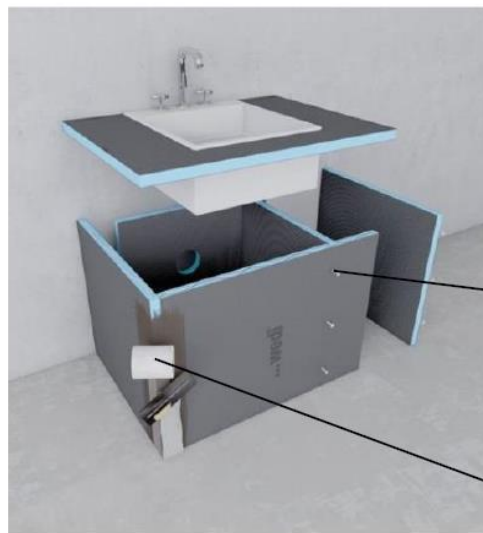

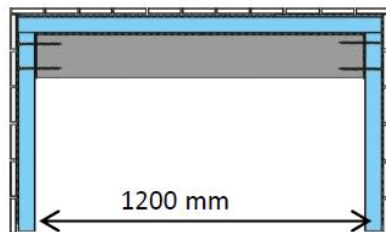

Costruire strutture e mobili

DURANTE LA FASE DI INCOLLAGGIO DELLE VARIE PARTI SI CONSIGLIA DI BLOCCARE LA POSIZIONE DESIDERATA CON VITI AUTOFILETTANTI DA LEGNO IN MODO CHE LA STRUTTURA POSSA ESSERE SPOSTATA SENZA DOVERE ATTENDERE I TEMPI DI ASCIUGATURA DEL MASTICE WEDI 610

GIUNZIONI, SPIGOLI E IL POLESTIRENE RIMASTO A VISTA (lo spessore azzurro) DEVONO ESSERE ARMATI CON LA RETE IN FIBRA DI VETRO PRIMA DI PROCEDERE CON LA PIATRELLATURA

Max. 150 kg

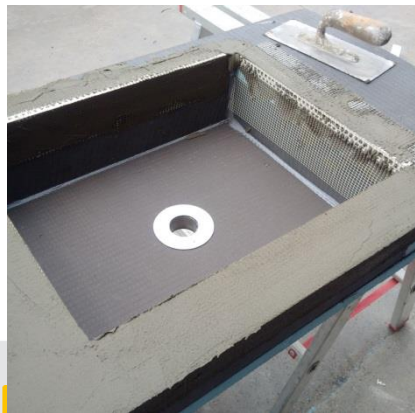

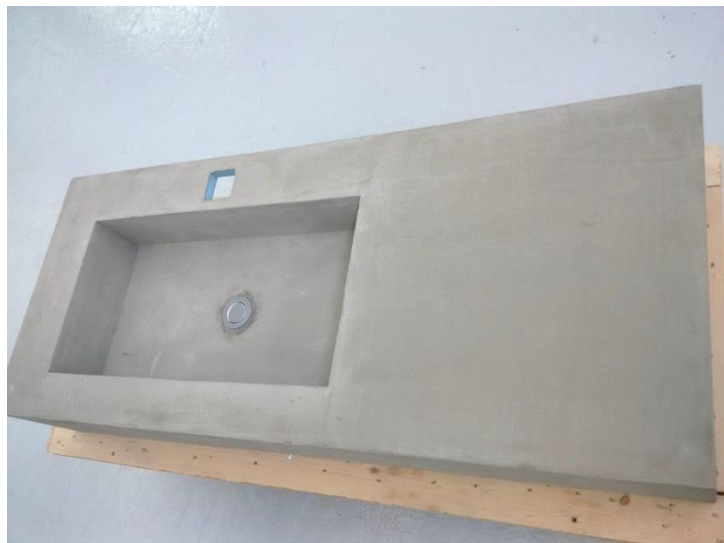

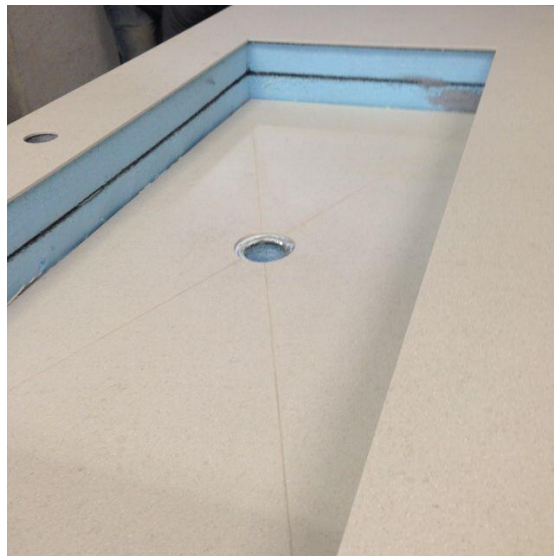

1200 mm

Prova con più di 200kg con interasse di 140 cm
